FOREWORD

Full year 1976 daily aircraft operations were obtained from 419 towered airports (418 operated by the Federal Aviation Administration (FAA).

Six different types of daily operations were reported by these airports on the FAA Form 7230.1, Airport Traffic Record:

- (1) Air Carrier itinerant
- (2) Air Taxi itinerant
- (3) General Aviation itinerant
- (4) Military itinerant
- (5) General Aviation (Civil) local
- (6) Military local

The material used in this handbook was developed by Advanced Technology, Inc. (ADTECH) under Contract No. DOT-FA77WA-3971. The main objectives of this contract were to further develop a package of computer programs to perform on-line computer statistical analyses on the daily tower data and to prepare the material used in this report. The report provides a convenient public document for summary reference and the data it contains are used by planning personnel in the FAA, other government units, and external sources for airport studies that require such background information for forecasting, capacity, and environmental analyses. Within the FAA, the computerized daily tower activity statistics are utilized as basic input for forecast models, airport planning, and for facility planning of the air traffic control system.

For this report, the output of the computer programs displays specific statistics in tabular and graphical format. The tabular statistics include means, standard deviations and peak occurrences computed for individual airports as well as various multiple airport groupings. Frequency distribution histograms and time curves are presented in a graphical format for the entire nationwide set of airports.

Four FAA towered airports commissioned during the year 1976 were not included in this report because a full year of activity information was not available. These airports were:

	Airport	State	Month Commissioned in 1976
(1)	West Memphis	Arkansas	January
(2)	North Las Vegas	Nevada	January
(3)	Minot International	North Dakota	May
(4)	Clinton Sherman	Oklahoma	October

Two towers, Grand Canyon Municipal, Arizona, which was tower operated only eight months during the year, and Deadhorse, Alaska, which was decommissioned in September 1976, were not included in this report. The one non-FAA towered airport included was Falmouth, Massachusetts.

A complete list of the 419 airports included in this report is presented in an Airport Location Directory beginning on page vi. The output from the ADTECH computer programs for this data base was verified by comparison to the values published in FAA Air Traffic Activity, Calendar

Year 1976. There are only minor differences between the values presented in these two reports. An explanation for these differences can be summarized as follows:

- a. The minor differences between the values presented in Table 1
 and those presented in <u>FAA Air Traffic Activity</u>, <u>Calendar Year</u>
 1976, result from the use of different methods of data collection,
 i.e., daily traffic counts as opposed to monthly summaries.
- b. The summary statistics presented in Table 2 cannot be compared directly to those presented in <u>FAA Air Traffic Activity</u>, <u>Calendar Year 1976</u>, because Table 2 includes a non-FAA airport and, as explained on page iv, does not include all airports commissioned or decommissioned during calendar year 1976.

- 1/ The airports are identified as being in top 50 on the basis of total operations in CY 1976.
- Air traffic hubs are not airports; they are the cities and Standard

 Metropolitan Statistical Areas (SMSAs) requiring aviation services.

 Individual communities fall into four hub classes as determined by
 each community's percentage of the total enplaned revenue passengers in
 all services and all operations of U.S. certificated route air carriers
 in the 50 states, the District of Columbia, and other U.S. area
 designated by the FAA. Classifications in this publication, based on
 207, 172, 877 enplanements for the 12 months ending June 30, 1976, are:

Hub Classification	Percent of Total Enplaned Passengers	Number of Enplaned Passengers
Large (L)	1.00 or more	2,071,729 or more
Medium (M)	0.25 to 0.99	517, 932 to 2, 071, 728
Small (S)	0.05 to 0.24	103, 586 to 517, 931
Nonhub (N)	less than 0.05	less than 103, 585

SECTION I

SINGLE AIRPORT ACTIVITY STATISTICS

For each of the nine categories of operations for the 419 airports basic descriptive statistics were computed. These were: means, standard deviations, and peaks for daily, weekly, and monthly operations at each airport. Along with these statistics, quarterly and annual totals were also computed. The numerical values were all rounded off to the nearest integer and the letter codes "I" and "R," where shown, indicate that peak to average ratios would not be meaningful and were not computed.

SECTION II

AVERAGE AIRPORT ACTIVITY STATISTICS

The data incorporated in the single airport activity statistics formed the data base needed to compute average statistics for various groupings of airports. Similar descriptive statistics were computed for groups of airports as were computed for single airports. Instead of quarterly and annual totals, quarterly and annual means and standard deviations were computed. The peak airports were identified for daily, weekly, and monthly operations.

The composition of $71\frac{1}{}$ specific groupings of airports presented in the CY 1976 Tower Airport Statistics Handbook is as follows:

- (1) USA (419 airports)
- (2) REGIONS (11 categories of 419 airports)
- (3) STATES (50 states; 3 territories--Puerto Rico, Wake Island, $\frac{1}{2}$ and Virgin Islands; District of Columbia) $\frac{1}{2}$
- (4) Top 50 airports (most operations--as indicated by <u>FAA Air</u>

 Traffic Activity Calendar Year, 1976).
- (5) Large HUB airports (92 airports)
- (6) Medium HUB airports (59 airports)
- (7) Small HUB airports (106 airports)
- (8) Non-HUB airports (162 airports)

1/ For airport groups listed below, Average Airport Activity Statistics does not meaningfully apply because these groups contain only one airport. Tables for these "groups" were deleted from Section II.
The reader can refer to Section I for the related statistics.

Aircraft Groups	Section II Table Numbers Deleted	Section I Table Number Reference
Delaware	2-20	1-23
Rhode Island	2-51	1-21
Vermont	2-57	1-22
District of Columbia	2-63	1-73
Wake Island	2-66	1-419

SECTION III

AVERAGE DAILY OPERATIONS

The average daily operations reflect averages and standard deviations for each day of the week for the 419 airports. These statistics were computed for all the nine categories of operations. However, only general aviation itinerant and local activity are given in Section III along with daily averages for total operations. Other categories are available on request. Each airport in Tables 3-3, 3-6, and 3-9 is identified by its region, state, location, and the airport location identifier code.

NOTE: STAT - STATISTICS AVG - AVERAGE S.D. - ST. DEVIATION (XX) - DAYS IN THE YEAR

SECTION IV

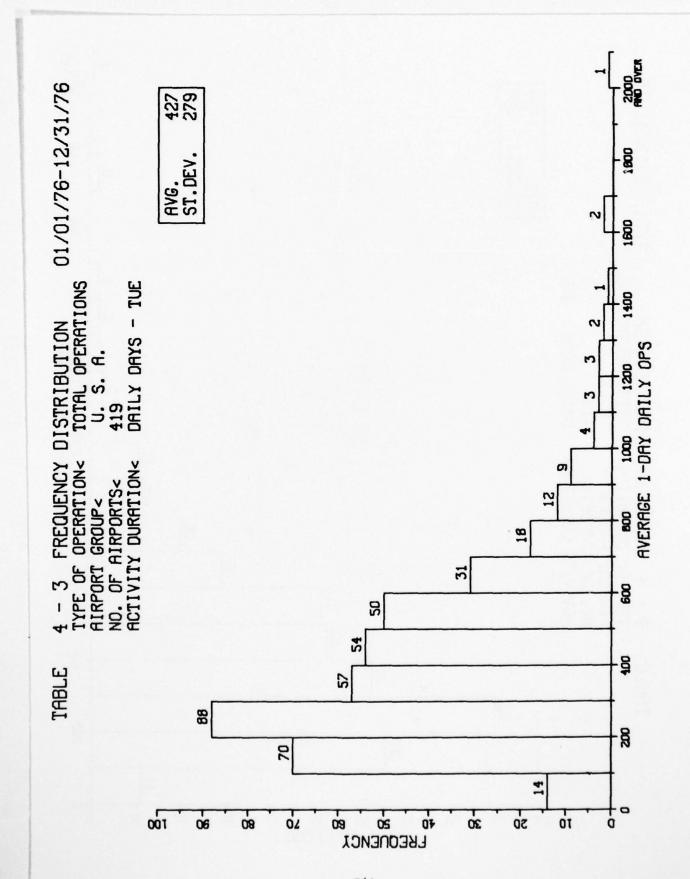

FREQUENCY DISTRIBUTION HISTOGRAMS

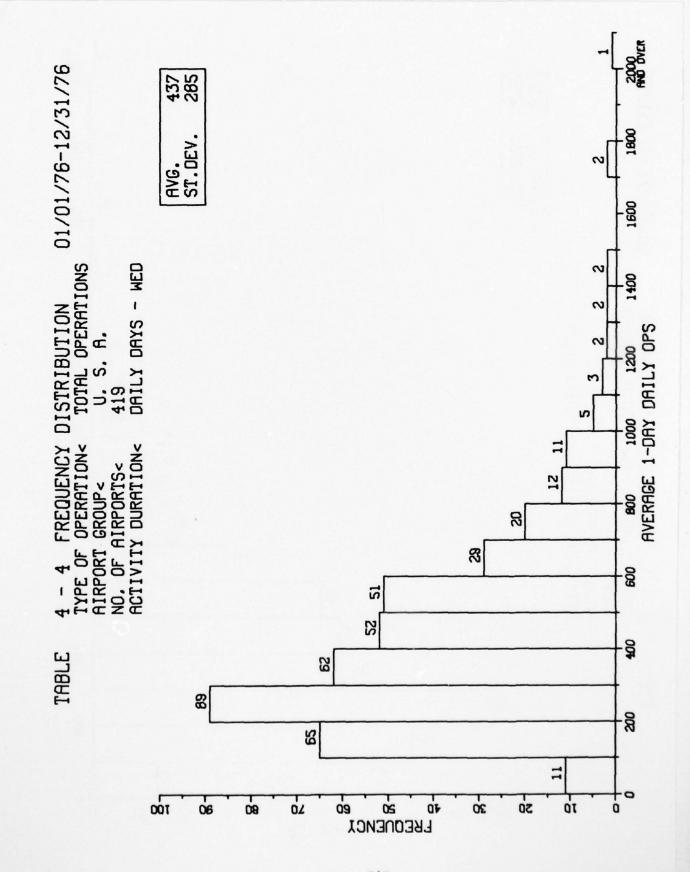

The frequency distribution histograms are presented for total daily operations by day of week for the 419 airports. Each histogram identifies the average as well as the standard deviation for the day under consideration. In addition, the number of airports in a specific interval is also printed.
